

JustHealth- Iteration Number 7

Iteration Start Date: 19.1.15

Iteration Finish Date: 1.2.15

Outline of what we want to achieve:

- A consistent design
- Implemented stronger and more professional design
- Validation on all aspects
- Feedback to the user on all possible areas

What we Achieved:

- Redesigned the website and android application
- Improved navigation and given users feedback on all possible areas
- Both web and android have improved design and have a more professional look

What we have learnt:

- Styles in android studio
- Layout in android
- Using colours properly in android and web

What we would do differently:

- We shouldn't have left all the design to a single iteration we should have designed professionally from the beginning.
- Focus more on issues as not many have been resolved this iteration.
- Concentrate and learn more front end validation
