

JustHealth- Iteration Number 9

Iteration Start Date:	16.2.15
-----------------------	---------

Iteration Finish Date:	2.3.15
------------------------	--------

Outline of what we want to achieve:

- Finish work on the admin portal- edit users profile, usage graphs
- To be able to search the NHS website directly from our applications
- To be able to track a patient and carers correspondence
- Display medication taken by the patients to the carer
- To notify a carer when the patient is running low on medication
- To be able to track when medication is taken

What we Achieved:

- With this iteration we completed all of the above aims. The admin portal is now complete, you can directly search the NHS website from both mobile and web.
- Patient and carers can track notes and view notes from their respective connection.
- Notifications and reminders now complete

What we have learnt:

- Thread tracking android
- Asynchronous events android
- Dynamic Google charts on the admin portal

What we would do differently:

- Use thread tracking and asynchronous events from the start of the project.
