# JustHealth Iteration 2 Plan

---

## 1.0 Aims:

- To have a fully functioning Android login screen that connects to the database
- The ability for users to be able to register and log in (Android)
- The login screen does not allow any erroneous data or attacks (Android)
- A 5 times failed login where the user will have to reset their password (Android)
- Once a user has logged in on the web they will be directed to a home screen for either patient or carer

## 2.0 Requirements:

### 2.1 Functional requirements:

1. Ability to register an account- Android
2. Ability log in to that registered account - Android
3. Ability to reset password- Android
4. A user will be locked out after 5 failed attempts- Android
5. Ability to view home page once logged in for carer/ patient- Web

### 2.2 Non-functional requirements:

1. User Documentation
2. Security (Android)
  - a. Encryption of passwords and sensitive user information
  - b. In-line network security
  - c. Physical network security
3. Robustness
  - a. Error handling
  - b. Security (as above)
4. Ease of Use
  - a. Simple and intuitive design
  - b. Clear colour scheme

### 2.3 Domain Requirements:

1. Security (Android)
  - a. Legal requirements will mean that the sensitive information e.g. password will need to be encrypted.
  - b. Terms and conditions accepting on registration

- c. Tick box to acknowledge that data provided is accurate and that it is the responsibility of the user to keep this information up-to-date and is not the responsibility of JustHealth (registration)

## 3.0 Design

### 3.1 Application start-up

- The application start up screen will be the same colour as the logo background (#2272EB)
- The logo will appear across the centre of the screen full width – either just the image, or both image and 'JustHealth'
- The buffering/loading icon will appear at the bottom (centre) of the screen, spinning.

### 3.2 User log in

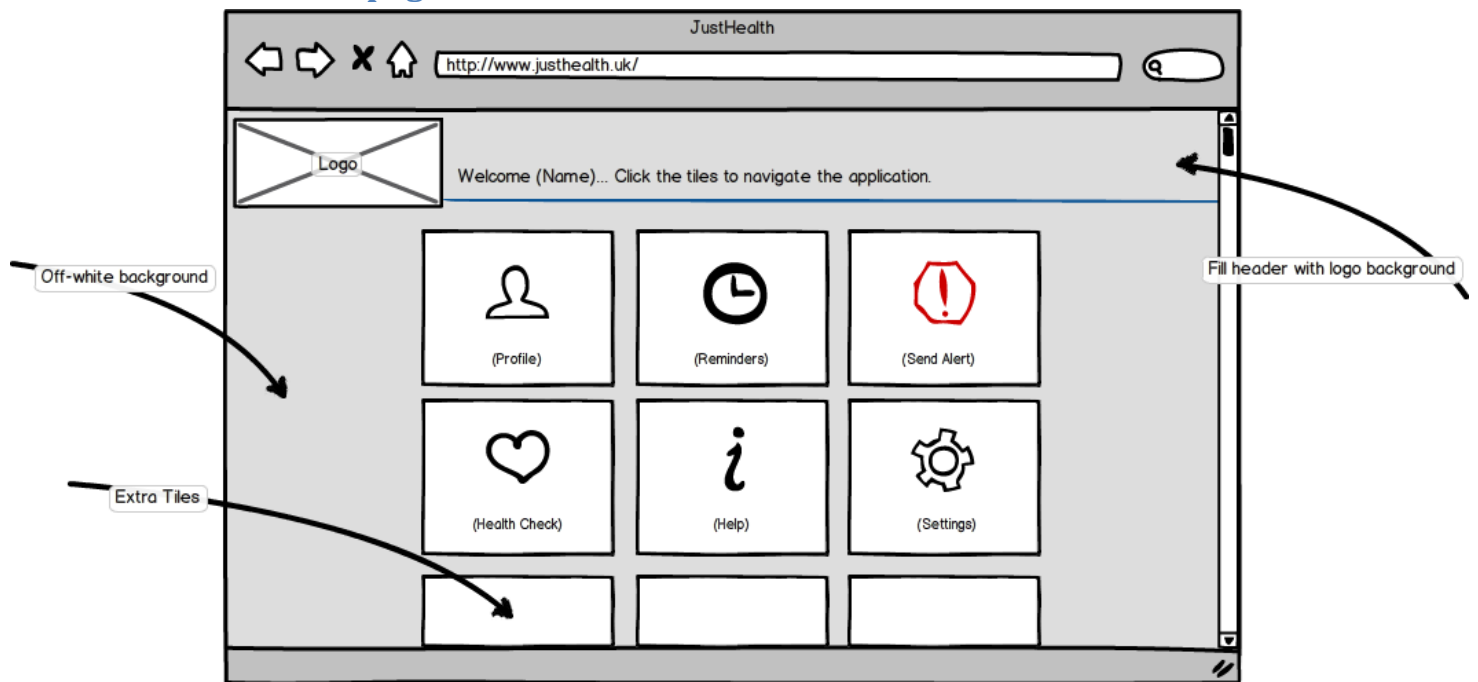

- The JustHealth logo will stay in the upper-left corner of the screen at all times, with the header of the screen based on the colour of the logo background.
- Quick access icons will be the same colour as the JustHealth logo font
- Page backgrounds will all be a shade of light-grey, text fields will be in white with all page content black.
- Buttons will be uniform in size
- Links will be clearly visible
- When the user presses on a text field, the device's native keyboard will show

### 3.3 Register user

- The form fields must be uniform in size and colour, location on the page will be controlled. The user will be able to scroll to show any additional fields.
- The 'Register' button will show at the bottom of the form
- The quick access buttons will stay in the top-right corner
  - 'Home' icon will navigate back to log in screen
- When the user presses on a text field, the device's native keyboard will show

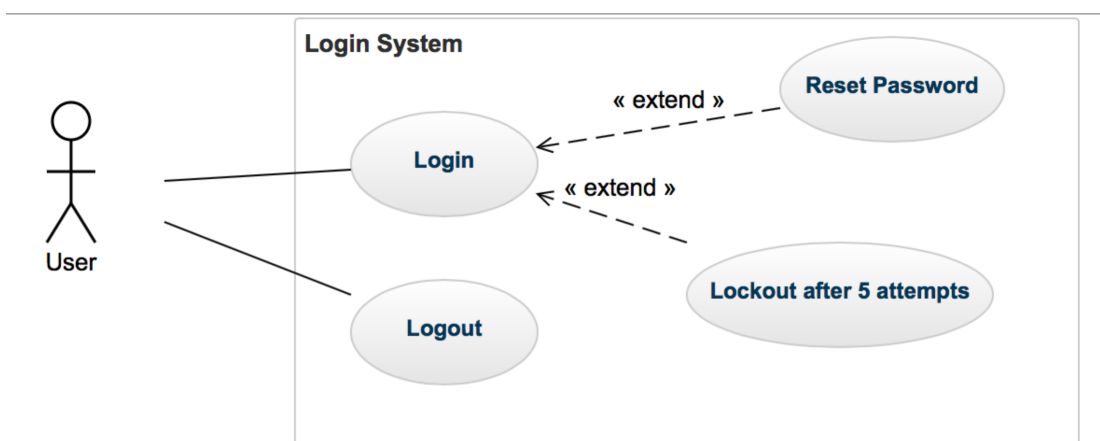

### 3.4 Web home page interface

- Tiles will be colourful and appealing; prioritised and organised on the page
- Tile icons will be centred and clear to the user
- There will be text in the header indicating that the profile belongs to a patient/carer

## 4.0 Use case:

### 4.1 Register and login account android

## 4.2 Registration and log in to homepage webpage
